

Empower 3 Enterprise or Workgroup Software For Servers

Qualification Workbook Documentation Set (part number 715002791, Revision B)

The Waters Empower 3 Enterprise or Workgroup Software For Servers Qualification Workbook Documentation Set provides installation qualification procedures for Waters® Empower™ 3 enterprise or workgroup software for servers.

The previous workbook (part number 715002791, Revision A) is replaced because the name of the qualification tool is updated to Empower SystemsQT™ for Software.

Changes from the previous documentation set are described below.

Installation Qualification Workbook, IQ (part number 715002791, Revision B)

The Installation Qualification Workbook is updated as follows:

- Cover page –The workbook revision and date are updated.
- All pages – Copyright dates are updated throughout the workbook.
- Page 2 of 10 – In the Requirements of Section 1, the name of the qualification tool is updated to Empower SystemsQT for Software.
- Page 3 of 10 – Form 1 is revised to include one performer and one reviewer.
- Page 5 of 10 – In the list of option in Form 3, replaced the ConnectionsAQT option with “Empower SystemsQT for Software”. Also, added the following options:
 - o Empower SystemsQT for Software MVM
 - o Empower Enterprise Data Manager 2 (EDM) Option
- Pages 5 through 6 of 10 – In Forms 3 and 4 revised the “Completed” column so the performer can signify received items as “Yes, No, or N/A”.
- Pages 7 through 10 of 10 – In Forms 5, 6, and 7 deleted the requirement for the performer to initial completed steps. The performer can now record completed steps as “Yes, No, or N/A”.
