1	176015008	ACQUITY UPLC H-Class CM Core System ACQUITY UPLC H-Class Column Manager Core System- 2 Columns
2	176015030	ACQUITY UPLC PDA eLambda Detector ACQUITY UPLC e»PDA Detector The ACQUITY UPLC Extended Wavelength Photodiode Array (PDAe») Detector is specifically designed to compliment the ACQUITY UPLC H-Class System. With noise specifications as low as 15 ¼AU, the ACQUITY UPLCPDA offers sensitivity across the full UV/Vis absorbance range, that is unmatched by any photodiode array detector on the market. Further, enhanced software control provides flexibility for simultaneous 2D and 3D operation in either Empower or MassLynx software. Detector wavelength range is 190-800 nm, with 1.2 nm spectral resolution. Detector response is linear with 5% ddeviation at 2.0 AU, Propylparaben at 257nm. Detector supports full three-dimensional spectral analysis or multi-wavelength operation (up to eight (8) wavelengths) under Empower Software control. Lamp optimization software guarantees low noise performance in the visible wavelength range and compensates for lamp degradation over time to ensure consistent response. The combination of lamp optimization software and an automatic second order filter enables operation in the linear wavelength range without requiring a lamp change. The lamp is warranted for 2000 hours. Results management features supported in Empower software include Spectrum Index Review, Spectral Contrast Peak Purity, Multi-Component Peak Purity, and Spectral Library Matching. Ideally suited for applications that monitor low UV and Visible wavelengths The 10mm analytical light-guided flow cell delivers sensitivity and resolution to ACQUITY UPLC applications. Low dispersion performance is achieved with a 500 nL internal volume and 62.5 ¼m PEEK interconnectinlet/outlet tubing.
