Detail Product Descriptions

Itm	Part No.	Description
1	176015001	ACQUITY UPLC Col. Mgr. Sys. -Right Inlet

ACQUITY UPLC Column Manager System required to take full advantage of the benefits of UPLC® in today's laboratory. The ACQUITY UPLC® Column Manager System forms the basis for more demanding UPLC system applications, particularly for method development using multiple 2.1 mm I.D. columns. The ACQUITY UPLC Column Manager System is an integrated solvent, sample and column management UPLC instrument configured for binary solvent delivery, sample introduction, column heating or cooling and column switching. The system may be configured for a broad range of applications supported by UPLC optical detectors and mass spectrometers, with a choice of instrument control and data management software. Waters® ACQUITY UPLC® Column Manager System provides greater flexibility and functionality by offering: Increased throughput, Simple method changeover, Column scouting and rugged performance

The following items are included as part of the core system:

- # ACQUITY UPLC Binary SolventManager
- # ACQUITY UPLC Sample Managerw/ Column Manager
- # ACQUITY UPLC Solvent TrayModule
- # ACQUITY UPLC System Start UpKit
- # Leak Sensors

2	176015026	ACQUITY UPLC PDA Detector
---	-----------	----------------------------------

The ACQUITY UPLC Photodiode Array (PDA) Detector is specifically designed to compliment the ACQUITY UPLC H-Class System. With noise specifications as low as 10⁻⁴ AU, the ACQUITY UPLC PDA offers sensitivity that is unmatched by any photodiode array detector on the market.

Further, enhanced software control provides flexibility for simultaneous 2D and 3D operation in either Empower or MassLynx software.

Detector wavelength range is 190-500 nm, with 1.2 nm spectral resolution. Detector response is linear (d5% at 2.0 AU) across the 2.0 AU dynamic range. Detector supports full three-dimensional spectral analysis or multi-wavelength operation (up to eight (8) wavelengths) under Empower Software control.

Lamp optimization software guarantees low noise performance in the visible wavelength range and compensates for lamp degradation over time to ensure consistent response. The combination of lamp optimization software and an automatic second order filter enables operation in the linear wavelength range without requiring a lamp change. The lamp is warranted for 2000 hours.

Results management features supported in Empower software include
