Subject: RE: Ming Deng - Onsite Calibration (Weigh Balance)

Hi Justin,

WE do not have the standard weight at the facility. Yes the balance is level. The table does not have wobble, else the other balance will behave experience same error.

Subject: Re: Ming Deng - Onsite Calibration (Weigh Balance)

Hi Joel,

Do you have standard weight in your facility? If yes please place the weight instead of water. Let me know if the readings still behave in the same manner after a standard weight is placed on it. Anything that is solid will do.

Secondly, I can see that the balance is level from the picture but how about the table? Are they a little wobble? Also, do ensure that the covers are close tight.

Do get back to me regarding the standard weight results.

Best regard,
Justin Zhuo

Subject: RE: Ming Deng - Onsite Calibration (Weigh Balance)

Hi All,

Mr Koo is not back from site job, I am replying here after checking with another calibration officer who was on the scene too.

When a standard weight was placed on the weighing scale, the readings were not stable and the number displayed kept changing. After trying a few times, there are some cases where the readings come back as "EEEE".

The calibration procedure cannot be started at all.

I hope the above clarifies the issue. Do let us know if you need further clarifications.

Thank you.

Best Regards & Many Thanks
