

SII for Xcalibur™

Version 1.8

Certificate of Software Validation

This version of the software has been designed, tested, validated, and distributed according to the Thermo Fisher Scientific Software Development Life Cycle process within the Thermo Fisher Scientific Quality Management System.

Structural and functional testing has been fulfilled in accordance with this process.

This software has met all functional specifications and release requirements.

The software release requires that the protocol for changing Thermo Fisher Scientific software products includes documentation of the release and the archiving of source code in a secure location.

Release Notes for this version are provided with the software media.

If required for review by authorized governmental or regulatory representatives, Thermo Fisher Scientific can provide confidential access to source code along with access to documents and reports related to Thermo Fisher Scientific software products. Please note, a standard non-disclosure agreement may be required. All documents shall, at all times, remain in the possession of Thermo Fisher Scientific Corporation.
