Hi Stewart/Bills,

Thank you for your support! We're glad to know this Server Replacement is on our schedule now.

I will communicate with CMs this transition will be commenced on the week of Apr 29, 2019.

Please let us know the details of process & requirement such as date&time of this transition or if it's required production down or not, etc when time closer to the date of this transition.

Thanks and FYI, the old Servers' Dell service contract is expired in Jan 2019 and there's no renewal for the old Servers as we already have the new servers on hot standby state now.

Subject: Re: Asia Contract Manufacturing Servers - Replacement Servers Status

Hi Bill,

In response to your questions:

Yes the servers are in their final configuration with all data located in D:\Data\
The server IPs can be switched if required to maintain mappings.

We can have a call closer to the time to review the full process and requirements, but if you have any further questions please send them over.

HuaZhen - does this week work ok for you?

Thanks,

Stewart Beel

Hi Stewart,

I don't have a problem with the week of April 29, 2019.

A few questions:

Are the "Replacement Servers" in their final configuration: D:\Data\ ? (ie. Data drive folders, etc.)

Is the plan to switch these "Replacement Servers" IP addresses to the 10.249.XX.1 ? (to maintain the current mapped drives)

NOTES:

We will need some time to:

- Set-up the various domain & local accounts on each server. (can be accomplished prior to April date)
- Copy both; legacy & current data from old servers (needs to be done at time of switch) time consuming task.
- Test & Troubleshoot same

Please advise,
~Bill

Hi Bill,

Thanks for the feedback. Great point on the quarter end, I hadn't considered this. I'll push the date back to April. Week commencing Monday 29th April looks clear for me, I just need confirmation from Bill Irons that he is available that week.

Many thanks,

Hi Folks,

Any week is OK by me, but I expect Bill Irons will bear the bulk of the work required to get the labelers running and shared access to the engineers that need it.

I would push that date a few weeks forward though, so as not to interfere with the end of

the quarter revenue. Anytime in April should be fine.

Bill

Hi HuaZhen

I have discussed the server replacement with David and we are keen to move this forward. Looking at my schedule the best week for me to do the transition is week commencing 18th March, which is later than I had hoped, but my diary has filled up very quickly already. Is this week convenient for all other people involved? We would need the input from both Bill's to assist in moving any applications and carrying out testing.

Could you let me know if this week is acceptable?

Many thanks,
